

Everyone,

This is the link to the Federal Trade Commission National Do Not Call Registry

<https://www.donotcall.gov/register/reg.aspx>

By registering your phone number you can prevent most phone solicitations. This works for both your home and cell phone numbers. However, if you give your phone number to a business your number will end up on a list that is sold to phone solicitation companies and you will need to register again. When dealing with a business in person or on-line ask to see if they have a policy regarding not selling your personal information. If they don't then you can expect to get unwanted phone calls.

I hope this helps,

Chief Bill Bolt
