

The City of Minneota is asking residents to keep all grass clippings or other yard waste out of the City streets and alleys. Please direct your mower away from the street and back onto your property and remove any clippings that may have been accidentally blown into the street. Stormwater pollutants such as clippings, leaves and other yard waste place a burden on the City's stormwater system. This extra material can not only cause back-ups resulting in flooding, but also sends chemicals and other pollutants directly into our lakes and streams. Please help to be environmentally responsible by mowing and blowing these items **AWAY** from the street.
